## CHAMPAGNE PREMIER CRU

### TRIO DES ANCETRES

**3 exceptional Cuvées de Cépage aged in cask from Premier Cru vineyards.**

#### PACKAGING

Well this is it... Finally after years of being undecided about the packaging/dosage/name of my new cuvées... 3 exceptional champagnes each representing one Champagne grape, aged in wood before bottling for a year, then 9 years on their lees before disgorgement

#### DESCRIPTION

1 top of the range Champagne bucket made of 1cm thick real barrique wood ready for sale including 3 Zero Dosage cuvées

#### CUVEES

Each of these 3 cuvées representing one Champagne grape has been put in barriques in mai 2001, bottled in mai 2002, and will be disgorged with no dosage as a Brut Nature after currently 9 years on lees

- Cuvée **FIRMIN** Dumangin: Blanc de Chardonnay (100%). Firmin was the first "Dumangin" to own and work on vineyards (1622)
- Cuvée **HIPPOLYTE** Dumangin: Blanc de Pinot Noir (100%). Hippolyte was the first generation of Champagne maker in the family end of the 1800s (Gilles is the 5th)
- Cuvée **ACHILLE** Dumangin: Blanc de Meunier (100%). Achille was the 2nd generation

#### ADVANTAGES

- The bucket is ready to be sold in shops as it is. It will have its own barcode, back label
- It is the ultimate tasting and gift package... 3 champagne grapes to be tasted in one go each in a different bottle.
- The bucket is a "useable" Champagne bucket (can be used for refreshing the 3 cuvées in one go or even a magnum). A bucket I can guarantee no-one will ever throw away...
- It will shipped in a strong cardboard box and dividers for protection.
- It is NIMP15 treated for sale everywhere in the world.
- Eco-side: ALL the components of this package come Champagne to avoid lengthy transportation and CO2 emissions. Bucket is made by the Tonnellerie de Champagne-Ardennes, box/labels/foils/corks/bottles by a local provider... Grapes and wine by Champagne Dumangin obviously :-)
